## **Education:**

University of Massachusetts Lowell, Lowell, MA

[May 2019]

- Candidate for Bachelor of Science in Computer Science
- Major GPA: 3.75
- Related Coursework: Compiler Construction, Mobile Apps, GUI, Computer Architecture, Operating Systems, Assembly Language, Computing I-IV, Logic Design, Discrete Structures I-II, Calculus I-II.

English High School, Lynn, MA

[May 2014]

- National Technical Honor Society member

## **Technical Skills:**

- Programming: C, C++, OCaml, Java, JavaScript (React + Flux Architecture), and Python.
- Other: SQL, HTML, CSS.
- Operating Systems: Mac OS X , Ubuntu Linux , Windows 10/8/7/XP.
- Technologies: Git, Apache SVN, MySQL, Microsoft Word, PowerPoint and Excel.

## **Academic Projects:**

Racket Compiler (*OCaml*):

- Implemented a Racket to x86-64 compiler for a Turing-complete subset of the Racket language.
- Features: Garbage Collection, Register Allocation, Functions, Closures, Parametric Polymorphism, Sum Types, Vectors, Control Flow, etc.
- Runtime system implemented in C. Compiler implemented in OCaml.

College Bookstore (*Java*):

- Implemented an Android application that would allow students to sell and buy textbooks.
- Utilized Google's Firebase Authentication and Database, NoSQL, Android SDK.

Poker Game (*C++*):

- Implemented a command line game that allows the user to play poker against the computer. When dealt cards, the computer intelligently makes decisions to try to beat the user.
- Utilized data structures, pointers, makefiles, and modular object-oriented design.

## **Work Experience:**

Software Engineer Co-op, Curriculum Associates

[May 2016 - Present]

- Developed new product features for multi-tenant, SaaS products in a J2EE/JavaScript environment using frameworks such as Hibernate, Spring, jQuery, and Node.js.
- Worked effectively as part of an Agile team and gained experience with issue tracking system JIRA.
- Developed web projects using React and Redux. Including creating Node servers and RESTful APIs.
- Created GUI applications using Java's Standard Widget Toolkit.
- Wrote and updated automated unit tests using JUnit, Jest and Karma.

Merchandising Specialist, Best Buy

[August 2015- May 2016]

- Fixed/configured electronic displays, hardware and software. Electronics include: televisions, computers, tablets, digital cameras, speakers, and video game consoles.
